# STREAM IT Launches Free Online International Training Series on Gender-Inclusive STE(A)M Teaching

The [STREAM IT project](#), a Horizon Europe initiative dedicated to dismantling gender inequalities in STEM education, is excited to announce our upcoming free, four-part **International Teacher Training** online webinar series.

Taking place every Thursday from **October 1 to October 22, 2026 (16:00–18:00 CEST)**, this online series is designed to bring practical, inclusive strategies directly into today's classrooms.

Organised through our network of National Inspiration Hubs (NIHs), we created this series to help primary and secondary school teachers - especially those in STEM/STEAM subjects - recognise subtle gender biases and equip them with tools they can use right away. We also warmly invite school leaders, counselors, and education professionals to join us.

**Our main goal with this training is to increase awareness of how gender stereotypes shape learning environments.** We want to give educators a collaborative space to reflect on their own teaching contexts, share real experiences with peers across Europe, and walk away with concrete tools to build more inclusive classrooms.

**Delivered live via Zoom**, each interactive two-hour session will feature short presentations, open Q&A, and small breakout-room discussions.

**Registration is free and open** to educators across Europe and beyond. You can reserve your spot directly via our [Zoom Webinar Registration Form](#).

## Webinar Series Schedule & Focus

| Sessions                                                                             | Date & Time                          | Focus                                                                                          |
|--------------------------------------------------------------------------------------|--------------------------------------|------------------------------------------------------------------------------------------------|
